SUMMARY

As an avid web developer, I am on the prowl to better my skills and knowledge in the field, aiming one day to make a big impact on the world.

I have recently made the career change from sales to something that I am more passionate about, being a web developer. I am constantly learning new things and pushing my limits by building multiple projects.

PROGRAMMING LANGUAGES AND FRAMEWORKS:

HTML5, CSS3, Bootstrap, JavaScript, jQuery, AngularJS, Firebase, NodeJS, MongoDB, PostgreSQL, Ruby, Rails, Markdowns, Wireframing, Git

PROJECTS

HIVE Collaborative Code Editor

Are you tired of squinting up at the projector to see the code your instructor is writing? Do you have questions that your instructor told you to hold onto only to forget it when it's time to ask? HIVE code editor was created with instructors and students in mind. With real time coding, you can watch your instructor code on your own screen and never have to squint up at the projector screen again! Post it up on the question board for your instructor to see and they can answer it during the lesson!

Built with Firebase, ExpressJS, Javascript, jQuery, NodeJS and Bootstrap.

HashRobot

HashRobot is your personal marketing consultant. HashRobot will give the most visible and used hashtags in a given category. Using these hashtags will give social media users an edge in gaining more visibility and followers. HashRobot makes it easy for you to tweet right from our hashdash. Great content deserves to be #noticed.

Built with Ruby on Rails, jQuery, PostgreSQL, and Materialize CSS.
